PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 10+ years of experience in web and mobile applications, enterprise platforms and SaaS products. Hands-on with React, Angular, Node.js, TypeScript, APIs, SQL/NoSQL databases and AWS. Experience with PWAs, system integrations, real-time synchronization and application architecture, including technical leadership of a development squad and collaboration with multidisciplinary teams.

TECHNICAL SKILLS

Frontend & mobile: React, Angular, Next.js, TypeScript, JavaScript, React Native, PWA, HTML, CSS

Backend & APIs: Node.js, NestJS, Fastify, Go, PHP, C#/.NET, REST, SOAP, WebSockets

Data: PostgreSQL, MongoDB, MySQL, Redis, Prisma, SQL

Cloud, messaging & DevOps: AWS (Lambda, SQS, SNS), Docker, Kubernetes, CI/CD, BullMQ, RabbitMQ, Git/GitHub

Quality & observability: Jest, unit and integration testing, regression and smoke tests, observability, log analysis

Integrations & products: Stripe, Meta/Instagram APIs, OAuth, OpenAPI, SaaS, mobile applications, GIS

PROFESSIONAL EXPERIENCE

Altaa Digital — Aug 2026 – Oct 2026

Senior Software Engineer — Backend · Pousti project

- Worked exclusively on the backend of Pousti, an AI-powered content creation SaaS, evolving the APIs and contracts consumed by the frontend.
- Implemented fixes across agentic onboarding, data persistence and visual generation flows, including asset processing and storage.
- Maintained the Meta/Instagram and Stripe integrations covering publishing, metrics, OAuth, trials, subscriptions and POPs credits.
- Investigated incidents end to end using logs and observability practices, and validated changes with regression tests, staging QA and smoke tests.

Technologies: Node.js, TypeScript, Fastify, PostgreSQL, Prisma, Redis, BullMQ, Docker, Stripe, Meta APIs, LLMs

Antero Sistemas — Jun 2026 – Aug 2026

Software Consultant — Full Stack & Mobile · Independent projects

- Delivered web and mobile solutions on demand, from architecture to implementation, integrations and ongoing support.
- Lamp InPunto (V1, mobile app): defined the architecture and integration flows between the app and custom hardware used for sample processing and results delivery, coordinating technical decisions with a distributed team. V2, adding an administrative interface, is in planning.
- Antero Pedidos: built a custom order management platform with Next.js, React and TypeScript, as an independent project, to organize business workflows and reduce reliance on manual processes.
- Antero Sistemas website: designed and developed the corporate site with Next.js and TypeScript, featuring responsive interfaces, service presentation and email delivery integrated through Resend and Cloudflare.

Imagem Geosistemas
Apr 2024 – May 2026

Full Stack Developer · Petrobras projects

- Developed web applications and GIS solutions for Petrobras projects, working on geospatial visualization and integration services.
- Implemented tools to map wells and occurrences along seismic lines, focused on operational visibility and traceability.
- Integrated user interfaces, mapping services, databases and APIs to support operational workflows, applying observability and CI/CD practices.

Technologies: React, TypeScript, JavaScript, Go, RabbitMQ, Docker, GIS, REST APIs, SQL

Videosoft Soluções em Autoatendimento
Apr 2020 – Mar 2024

Full Stack Developer

- Evolved the VS Food PWA and self-service platforms for restaurants and retail, and served as technical lead of a development squad.
- Built integrations configurable from the admin panel, allowing changes without republishing the PWA.
- Developed an integration bot in NestJS, connected to WebSockets, AWS Lambda and queues, to synchronize product changes in real time, replacing periodic updates with event-driven communication.
- Implemented integrations with iFood, NCR Aloha/Colibri, TOTVS and GCOM, as well as testing and validation initiatives.
- Contributed to automated testing strategies with Jest and to the CI/CD routines used to build and deliver the PWA.

Technologies: Angular, PWA, Node.js, NestJS, TypeScript, JavaScript, Go, PHP, PostgreSQL, MongoDB, AWS, WebSockets, Jest

e-Frete
Mar 2019 – Mar 2020

Full Stack Developer

- Developed web features, APIs and integrations for freight quotation, tracking and management.
- Contributed to the Frete Cargas app (later Frete Mínimo) and to gamification solutions for truck drivers.
- Worked on database performance improvements and application stability.

Technologies: React, Node.js, TypeScript, JavaScript, C#/.NET, Redis, SQL, REST APIs

NOX Gerenciamento e Monitoramento de Riscos
Jan 2016 – Mar 2019

Software Developer — Intern to Junior

- Developed ERP systems, route visualization interfaces and business applications for logistics and administrative operations.
- Created a SOAP API for truck driver coordinates and a route monitoring solution using AWS SQS/SNS.
- Developed a Java desktop application integrated with a biometric reader to open a gate barrier.

Technologies: PHP, JavaScript, Node.js, React, React Native, .NET, Java, MySQL, AWS SQS/SNS

EDUCATION

Bachelor's Degree in Information Systems — Avantis · 2019

Postgraduate Studies (Lato Sensu) in Applied AI Engineering — UNIPDS · In progress since Jul 2026

LANGUAGES

Portuguese: Native

English: Technical and professional communication
