SUMMARY

I'm a Senior Full Stack Software Engineer based in Santa Catarina, Brazil, with over 10 years of experience building web applications, enterprise platforms and custom software.

My work spans frontend engineering, backend architecture, real-time integrations and business automation. I've also led a squad technically and worked closely with multidisciplinary teams.

I've contributed to projects across retail, logistics, geospatial systems and AI-powered SaaS products, pairing technical depth with a practical approach to business problems and turning operational challenges into well-designed products.

EXPERIENCE

Altaa Digital — Aug 2026 – Oct 2026

Senior Software Engineer — Backend · Pousti project

- Backend for an AI-powered content creation SaaS, working exclusively on the server side.
- Evolved APIs and the contracts consumed by the frontend; fixed issues in agentic onboarding, persistence, visual generation and asset processing.
- Worked on Meta/Instagram and Stripe integrations, incident investigation, observability and regression tests.

Technologies: Node.js, TypeScript, Fastify, PostgreSQL, Prisma, Redis, BullMQ, Docker, Stripe, Meta APIs, LLMs

Antero Sistemas — Jun 2026 – Aug 2026

Software Consultant — Full Stack & Mobile · Independent projects

- Delivered web and mobile solutions on demand, covering architecture, implementation and system integration.
- Lamp InPunto: defined the architecture and integration flows for the mobile application, connecting the software with custom laboratory hardware and coordinating technical decisions across a distributed team. An administrative management interface is being planned for the next version.
- Built an order management platform in Next.js and the Antero Sistemas corporate website.

Technologies: Next.js, React, TypeScript

Imagem Geosistemas — Apr 2024 – May 2026

Full Stack Developer · Petrobras projects

- Built web applications and GIS solutions, including tools to map wells and occurrences on seismic lines.
- Integrated mapping services, databases and APIs.
- Took part in CI/CD and observability practices.

Technologies: React, TypeScript, JavaScript, Go, RabbitMQ, Docker, GIS, REST APIs, SQL

Videosoft — Apr 2020 – Mar 2024

Full Stack Developer

- Evolved the VS Food PWA and led a squad technically.
- Developed an integration bot with NestJS and WebSockets, plus integrations configurable from the admin panel and connections to third-party systems.
- Automated testing with Jest and CI/CD practices.

Technologies: Angular, PWA, Node.js, NestJS, TypeScript, Go, PHP, PostgreSQL, MongoDB, AWS, WebSockets, Jest

e-Frete

Mar 2019 – Mar 2020

Full Stack Developer

- Built APIs and solutions for freight quotation, tracking and management.
- Contributed to the Frete Cargas app (later Frete Mínimo) and to gamification features.
- Improved database performance and stability.

Technologies: React, Node.js, TypeScript, JavaScript, C#/.NET, Redis, SQL, REST APIs

NOX Gerenciamento e Monitoramento de Riscos

Jan 2016 – Mar 2019

Software Developer — Intern to Junior

- Worked on ERP systems and route visualization tools, integrating location data.
- Built a SOAP API and messaging with AWS SQS/SNS.
- Developed a Java desktop application integrated with a biometric reader.

Technologies: PHP, JavaScript, Node.js, React, React Native, .NET, Java, MySQL, AWS

TECHNICAL SKILLS

Frontend: React, Next.js, Angular, TypeScript, React Native

Backend: Node.js, NestJS, Fastify, Go, REST APIs, WebSockets

Data & Messaging: PostgreSQL, MongoDB, MySQL, Redis, RabbitMQ, BullMQ

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD

Engineering Quality: Jest, Automated testing, Integration testing, Observability

EDUCATION

Bachelor's Degree in Information Systems — Avantis · 2019

Postgraduate Studies in Applied AI Engineering — UNIPDS · In progress since Jul 2026
